Technical Skills

- **Data & Analytics:** SQL, Python, Tableau, Forecasting, KPI Analysis
- **Tools:** Microsoft Excel, PowerPoint, Outlook
- **Documentation & Reporting:** Process documentation, dashboards, stakeholder reporting

Professional Experience

Graduate Assistant (Non-Teaching) (GANT), College of Business

East Texas A&M University | Aug 2025 – Present

- Support faculty and departmental staff with academic and administrative operations, ensuring accurate preparation of course materials, exams, and attendance rosters.

- Organize and format data and documentation to support reporting, compliance needs, and workflow efficiency.
- Assist with coordination of college events and student-facing activities, contributing to smooth execution and communication.

Supply Chain Transportation Specialist

Amazon.com, Inc. | 2020 – 2024

- Supported transportation operations across North American and European logistics networks, ensuring data accuracy and operational continuity across rail, road, and air systems.
- Monitored key performance indicators (KPIs) to identify delivery risks, process deviations, and system exceptions, enabling timely escalation and resolution.
- Analyzed operational data to support decision-making during high-volume and time-sensitive scenarios.
- Coordinated with geographically distributed stakeholders to resolve issues, maintain service-level standards, and reduce operational risk.
- Contributed to continuous improvement initiatives by identifying process gaps, strengthening controls, and improving reporting accuracy.

Additional Experience

Highway Design Engineer

Aarvee Associates Pvt. Ltd., Hyderabad, India | 2019 – 2020

- Analyzed traffic and survey data to support infrastructure planning and risk-aware design decisions.
- Coordinated data collection with municipal authorities, ensuring data reliability and documentation accuracy.
- Prepared technical reports and presentations for internal and external stakeholders.

Additional Information

- Strong alignment with professional ethics, data responsibility, and governance principles
